Functionality of the Baranova27 project

Develop a **mobile application** that will become a single information service with up-to-date databases for internally **displaced persons** in each country.

The application has categories for the main social and legal needs, which make it possible to **simply and easily** obtain the necessary information on the service of interest.

User instructions

Incident selection

After going through the instructions, the user must select **the incident** (event) that happened and because of which he is forced to **seek help.**

All service objects are linked to the selected incident.

9:41

← Select an incident

Country selection

To **optimize the display of data and its relevance**, the user selects the country in which he wants to receive assistance.

Main screen

The main screen has become **the main guide** of the project and is built on the principle of quick access to sections.
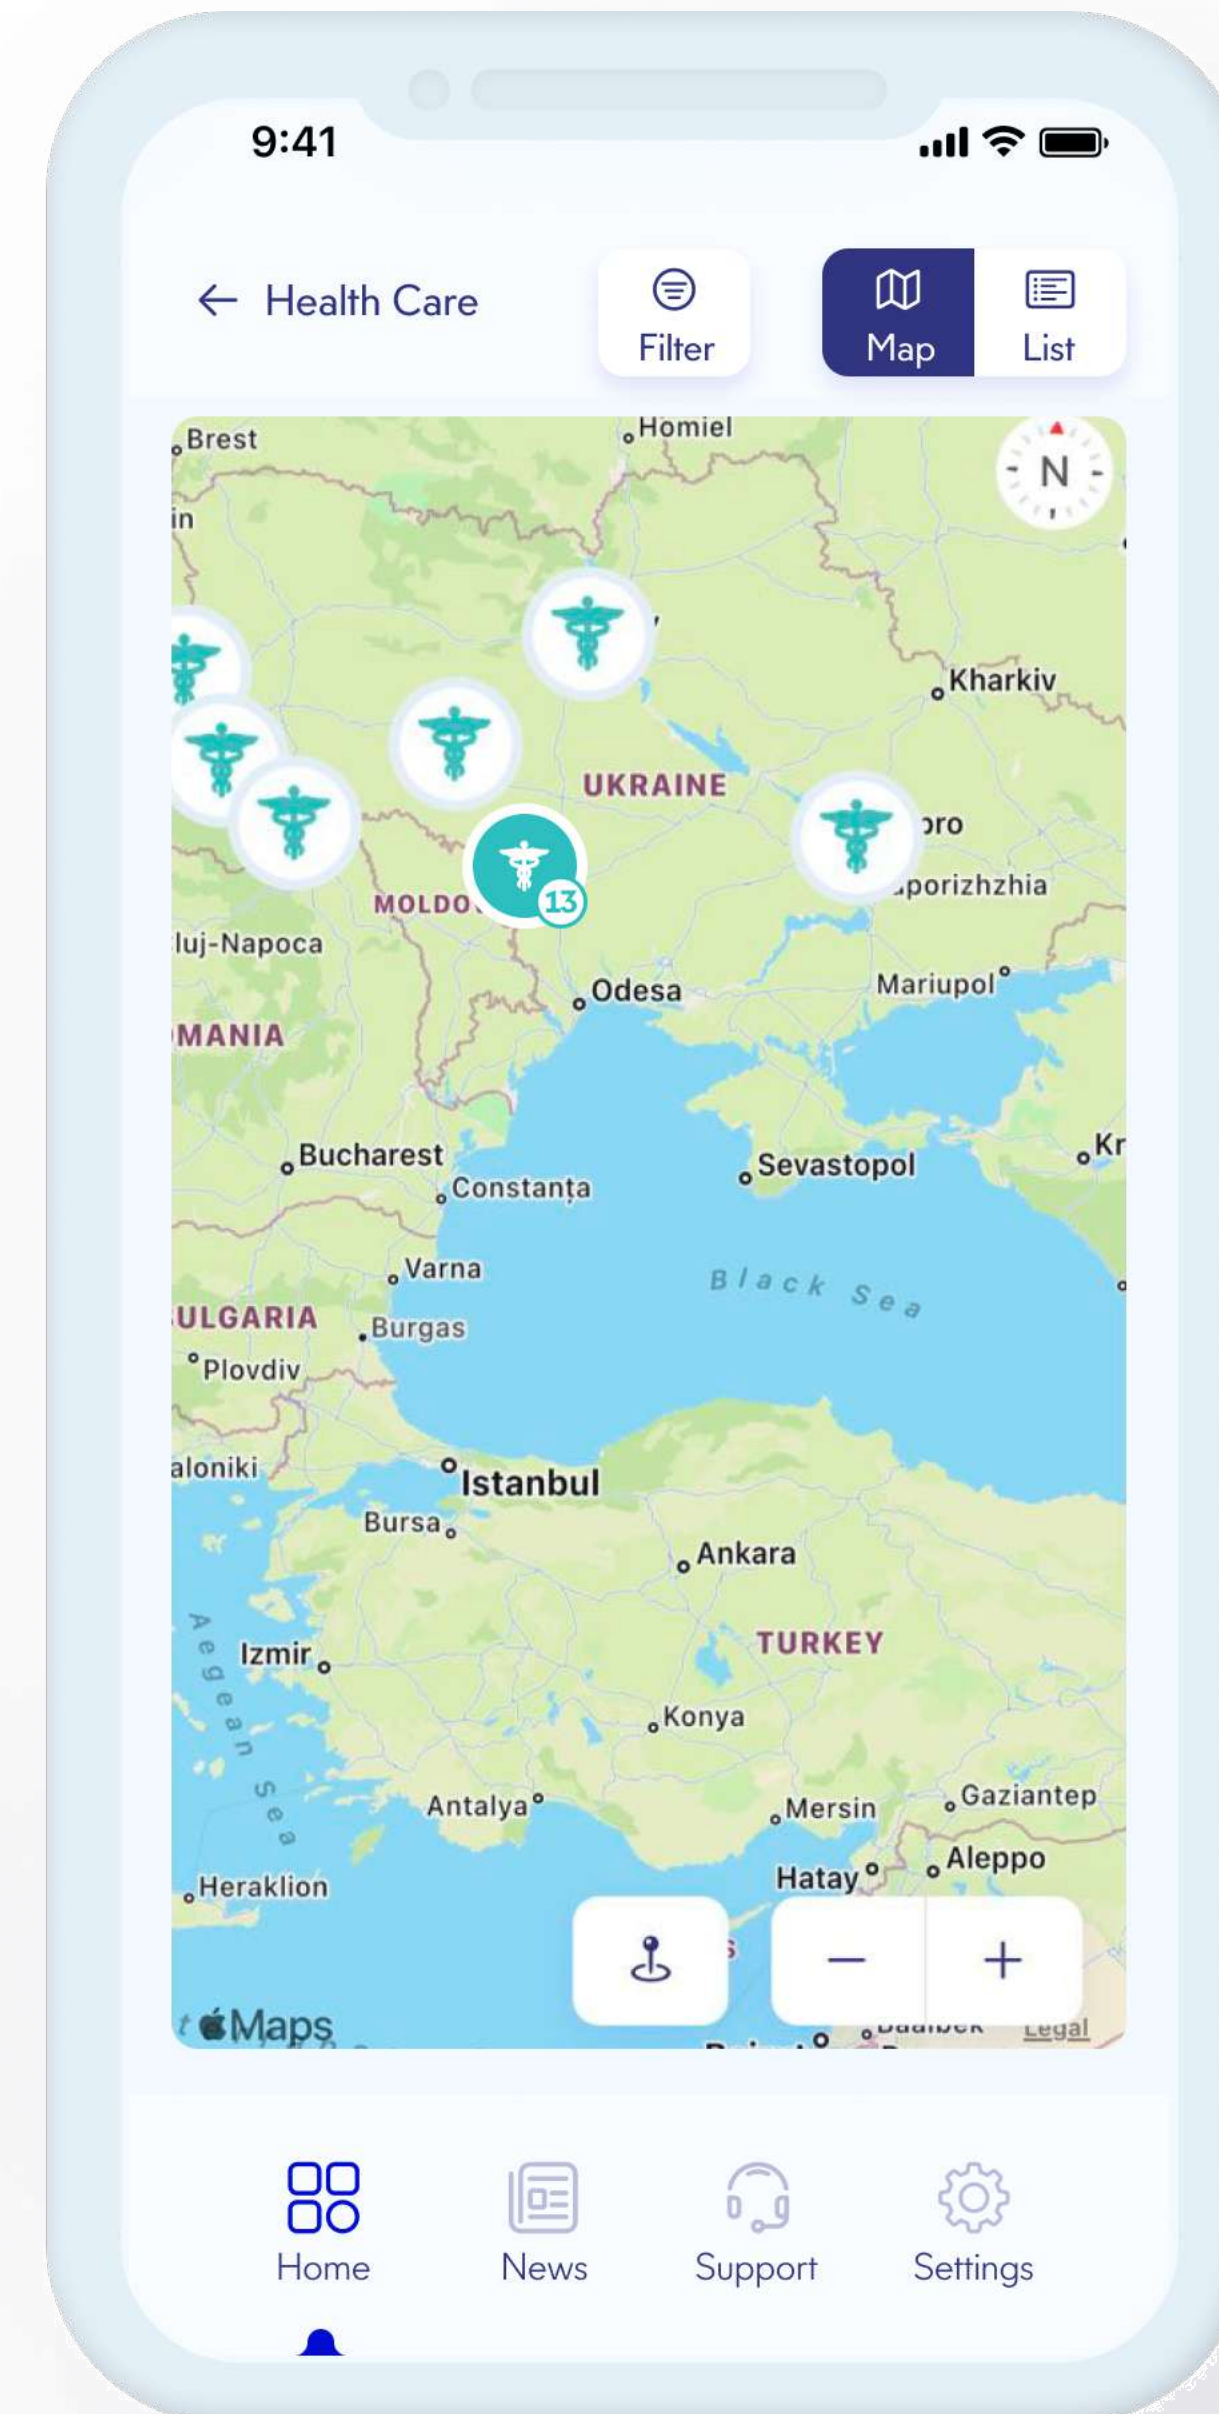

All information within sections is also fully managed through the **administration system.**
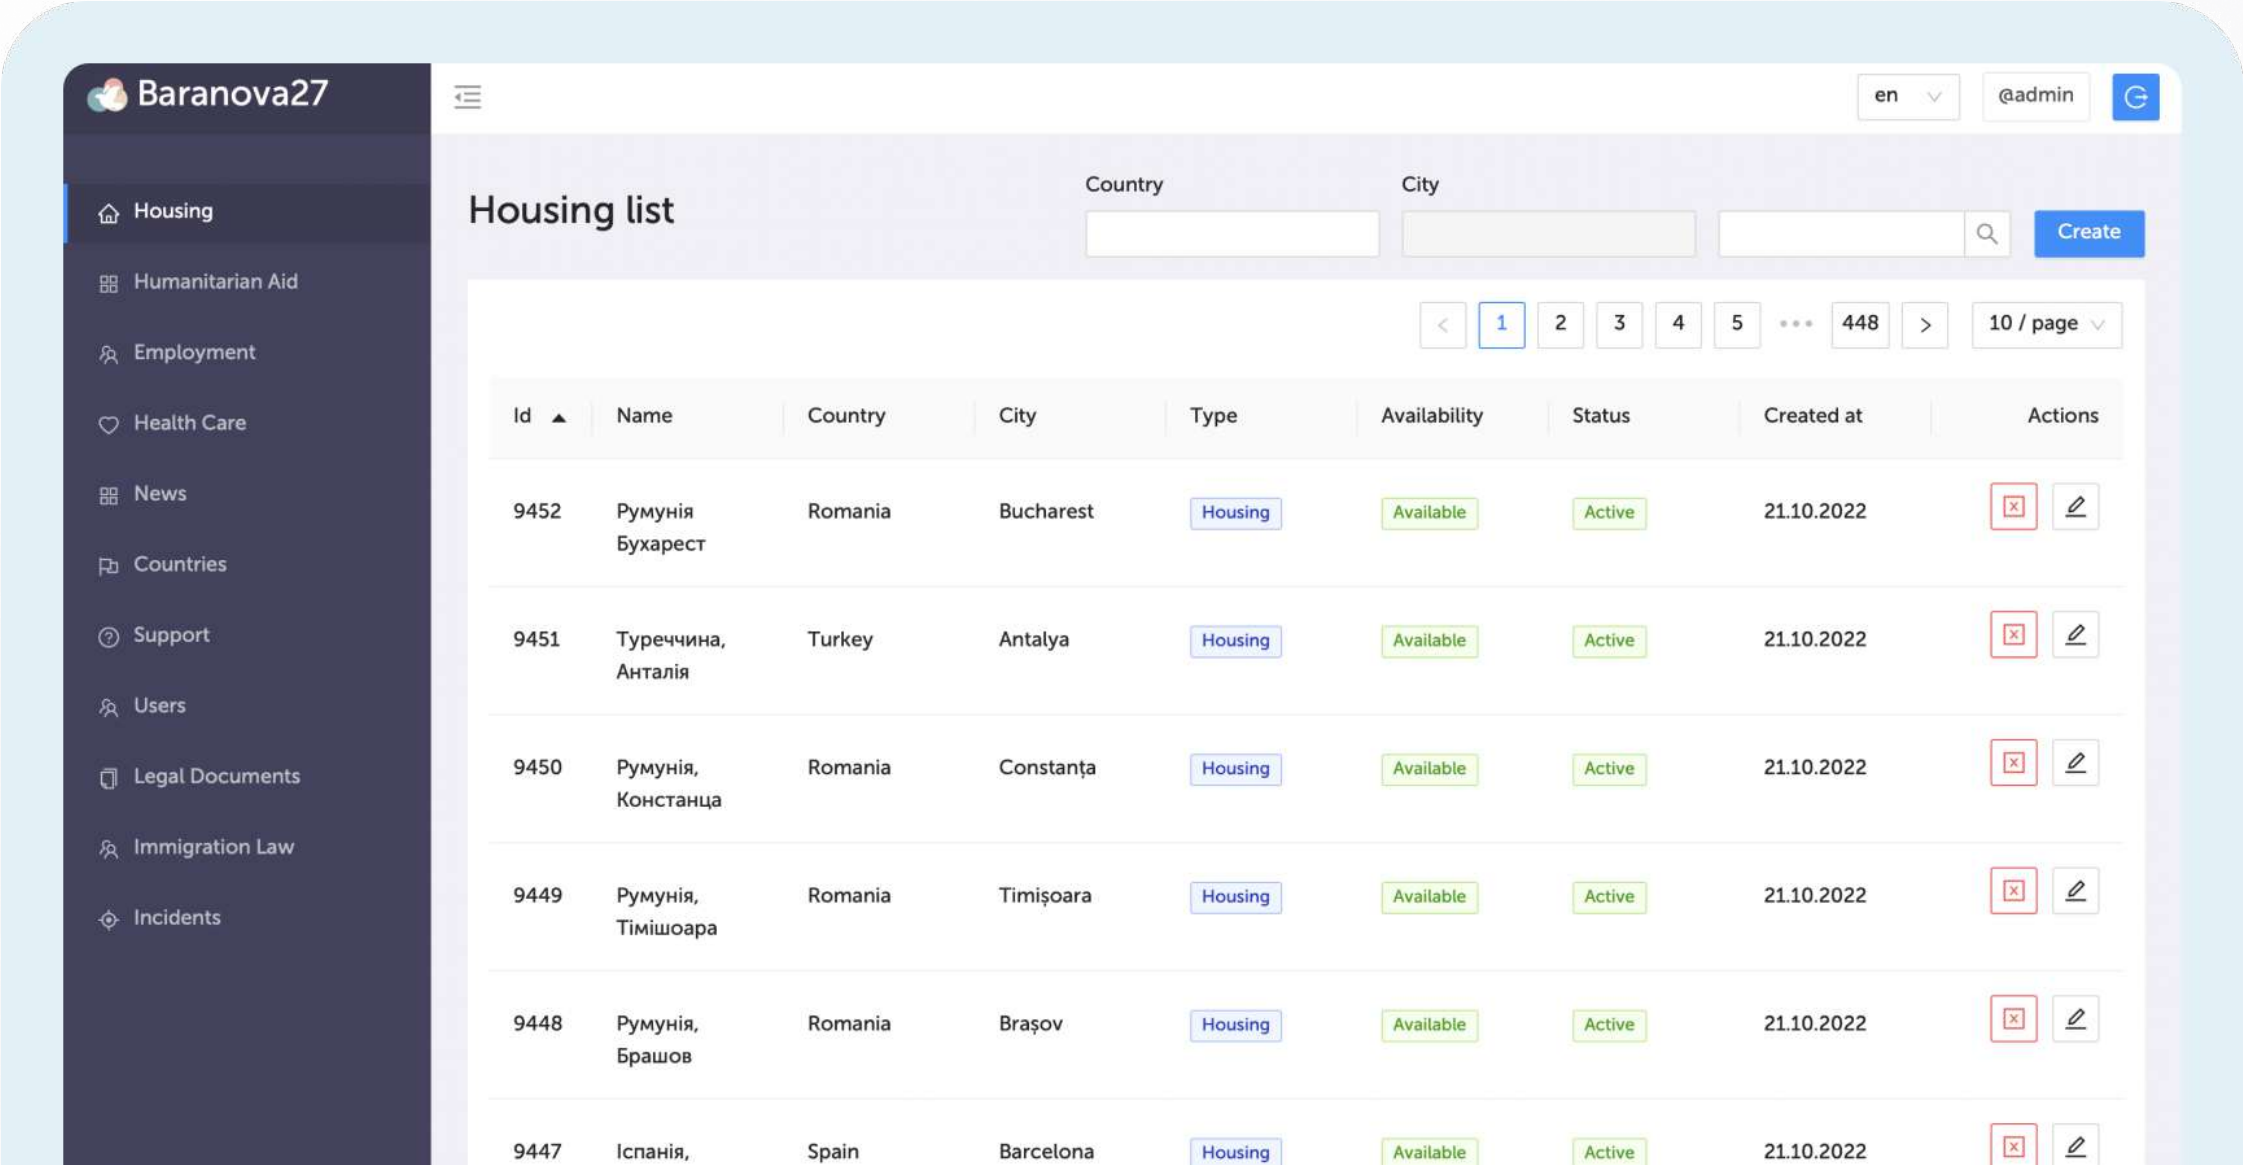

Map

In the service sections, it is possible to see the **location of objects** on the map. For user convenience, by default, the map displays all objects within the selected country.
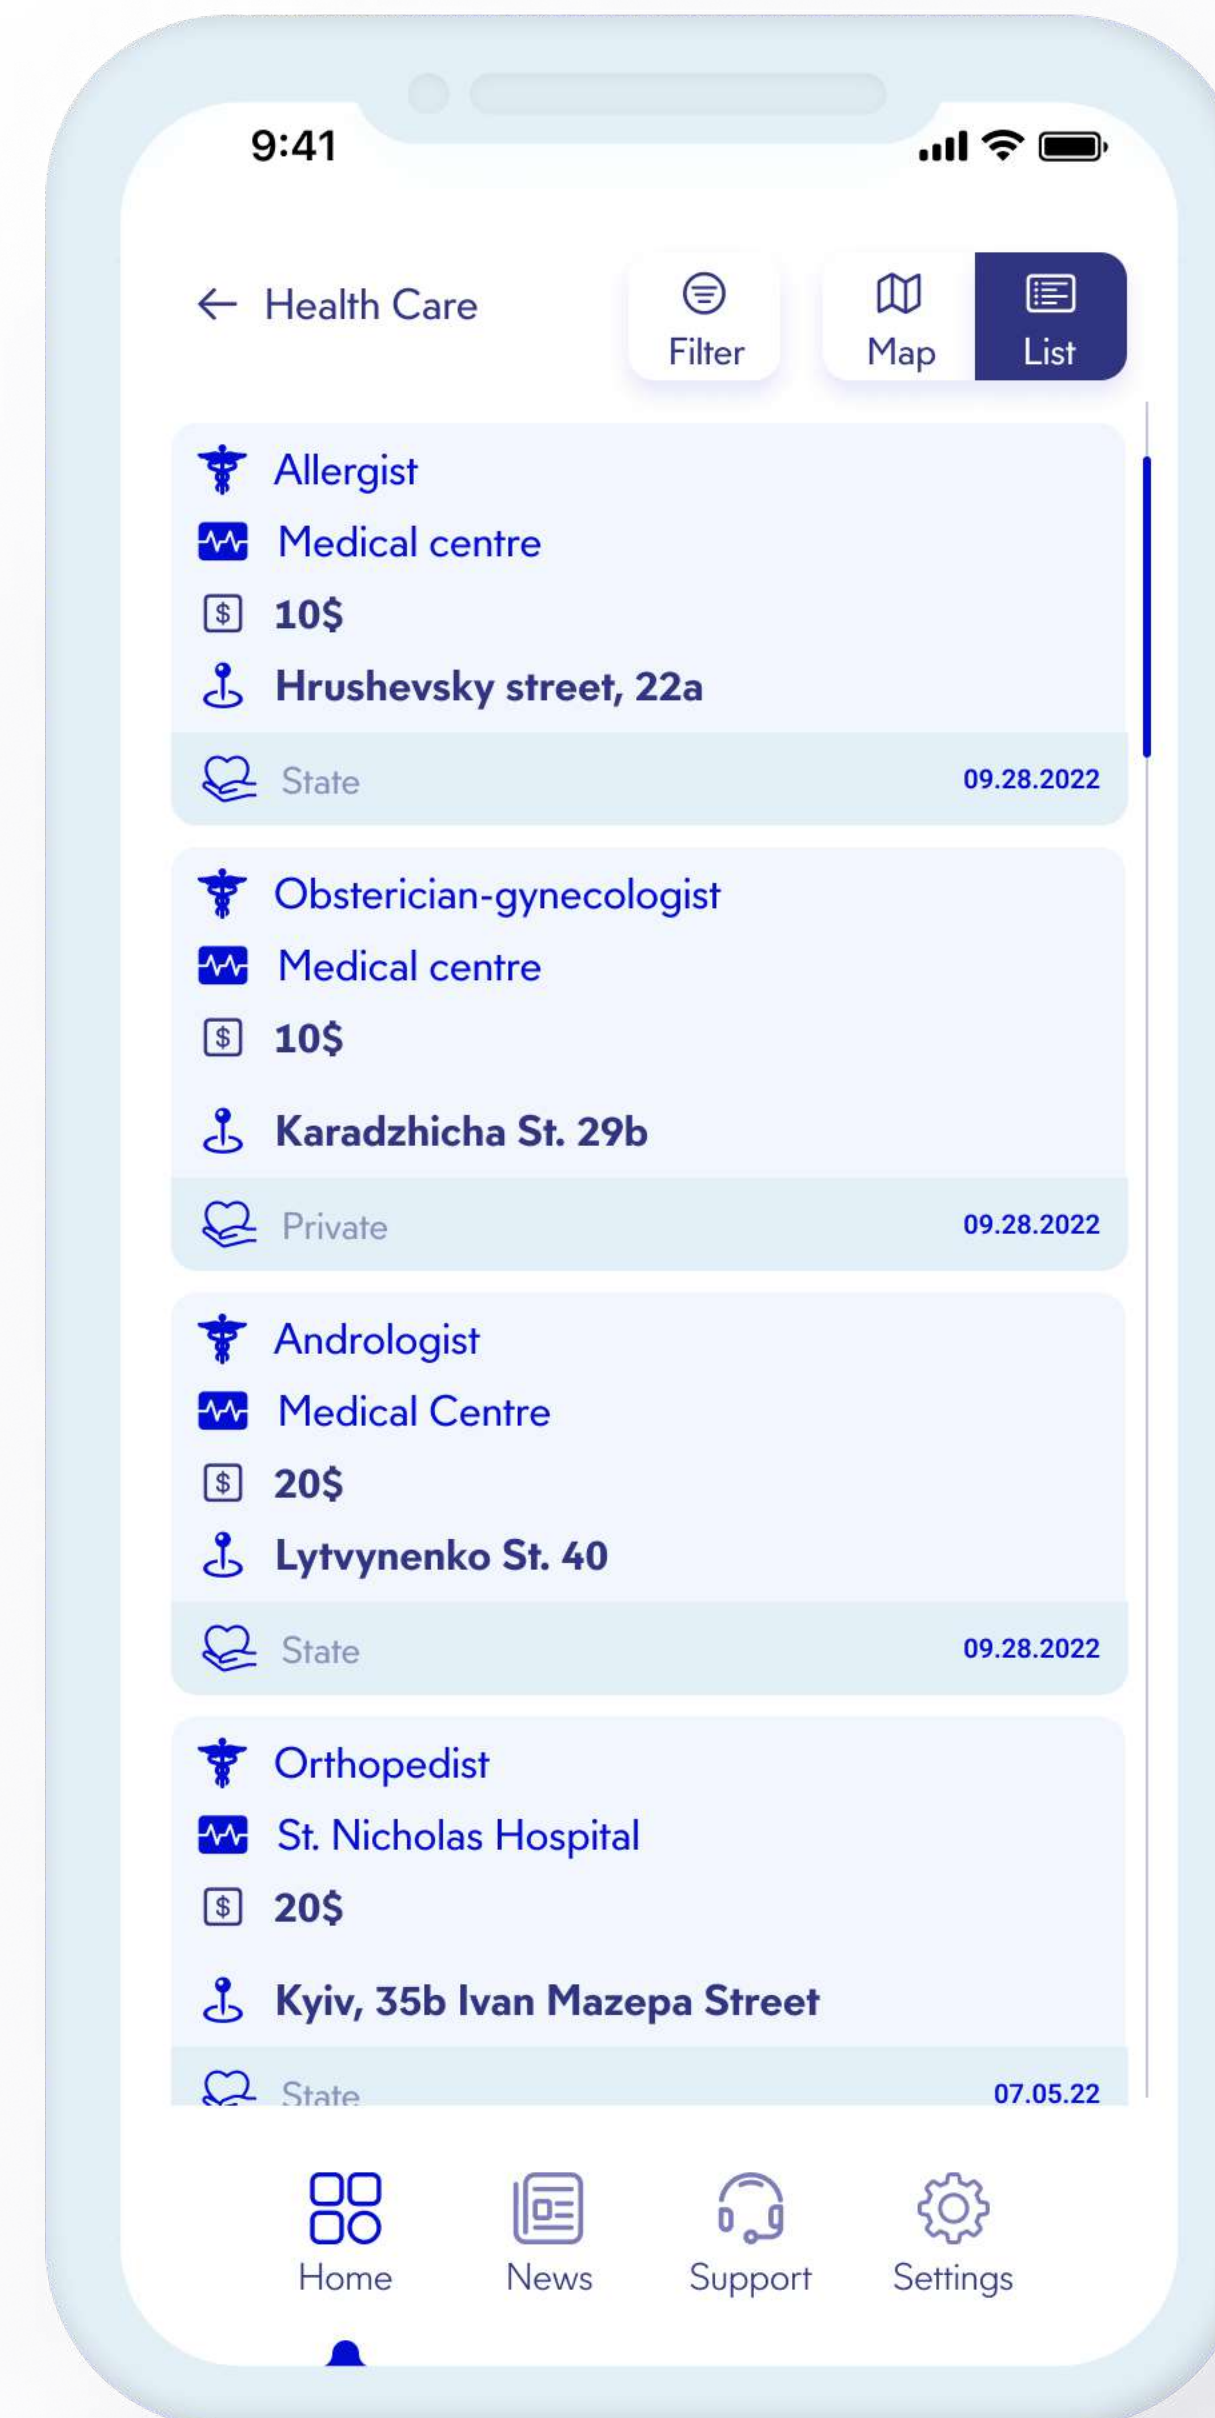

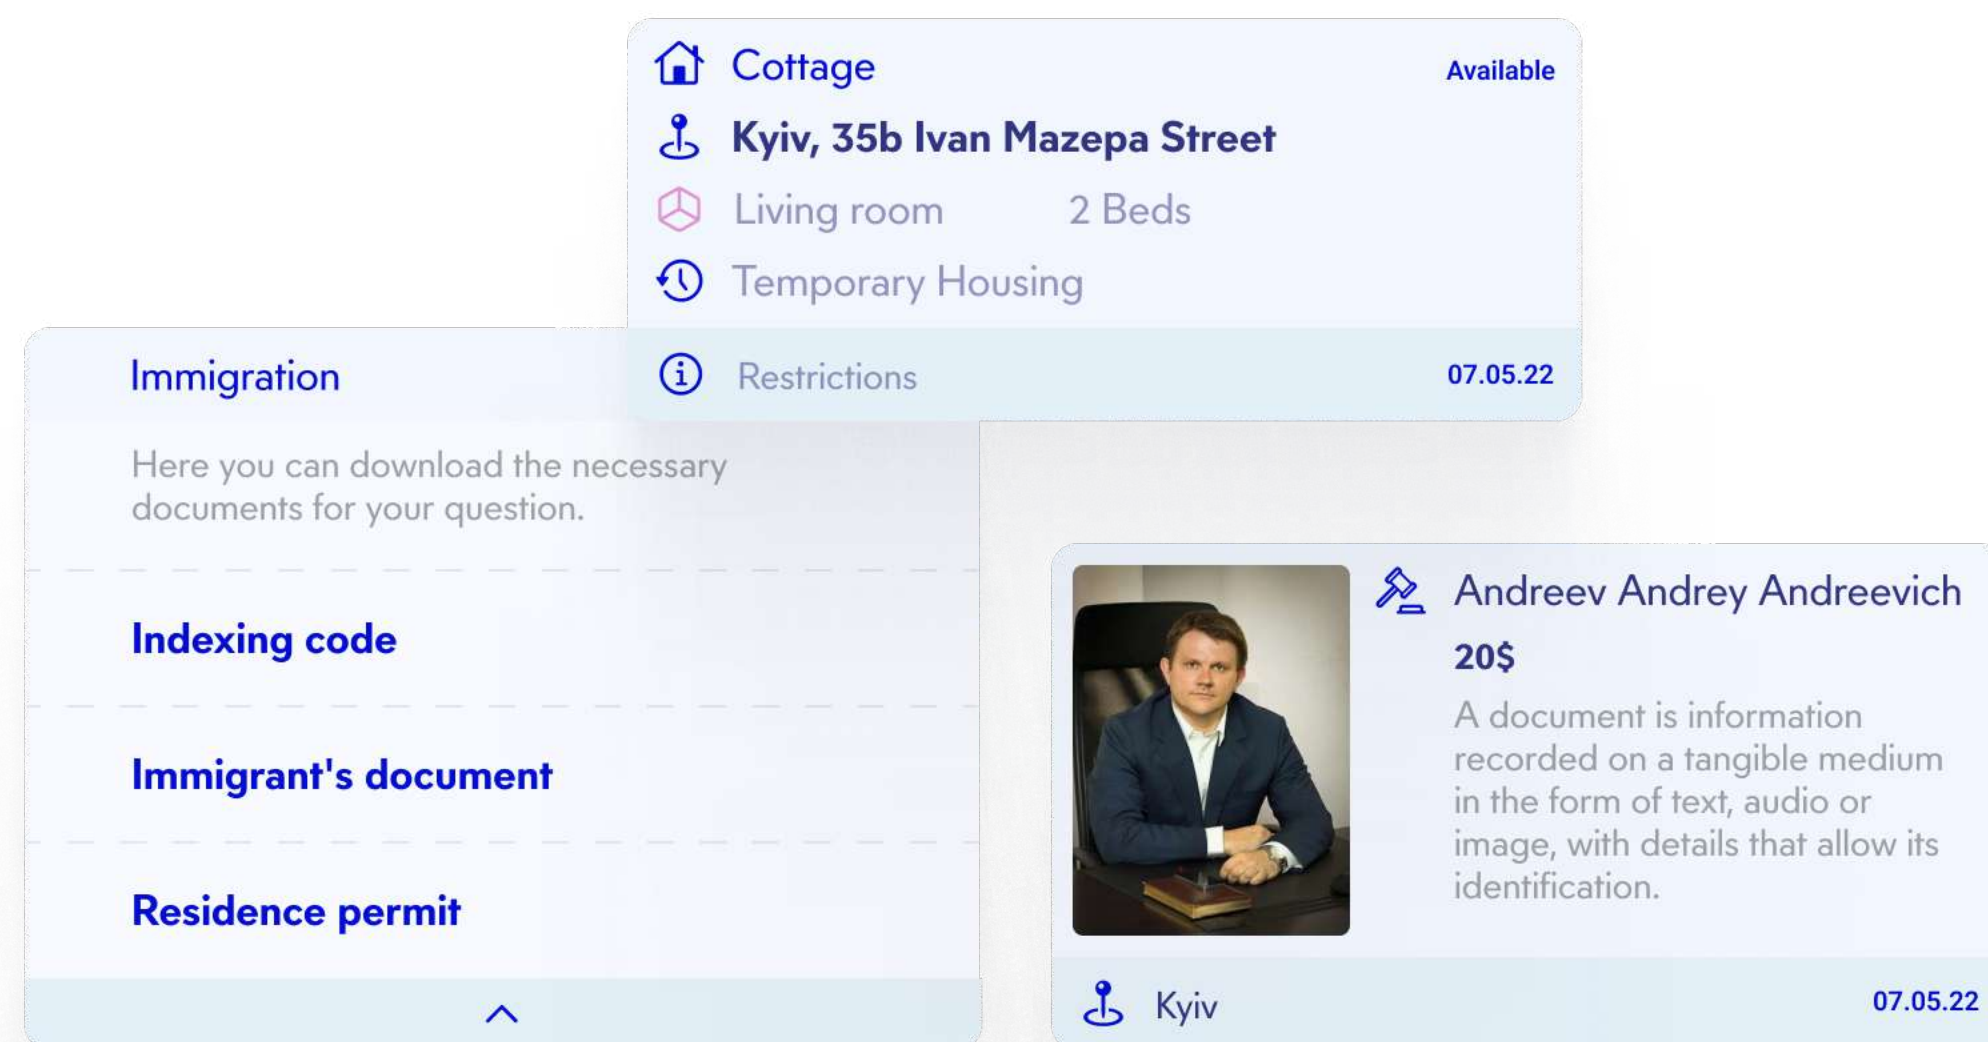

It is possible to **clarify the data** for each specific city or additional parameters that are in a specific service section using **filter sets**.

List of objects

For the convenience of the user, it is **possible to display objects** in the form of a list, which is formed depending on how far the objects are from the user, provided that **geolocation is enabled.**
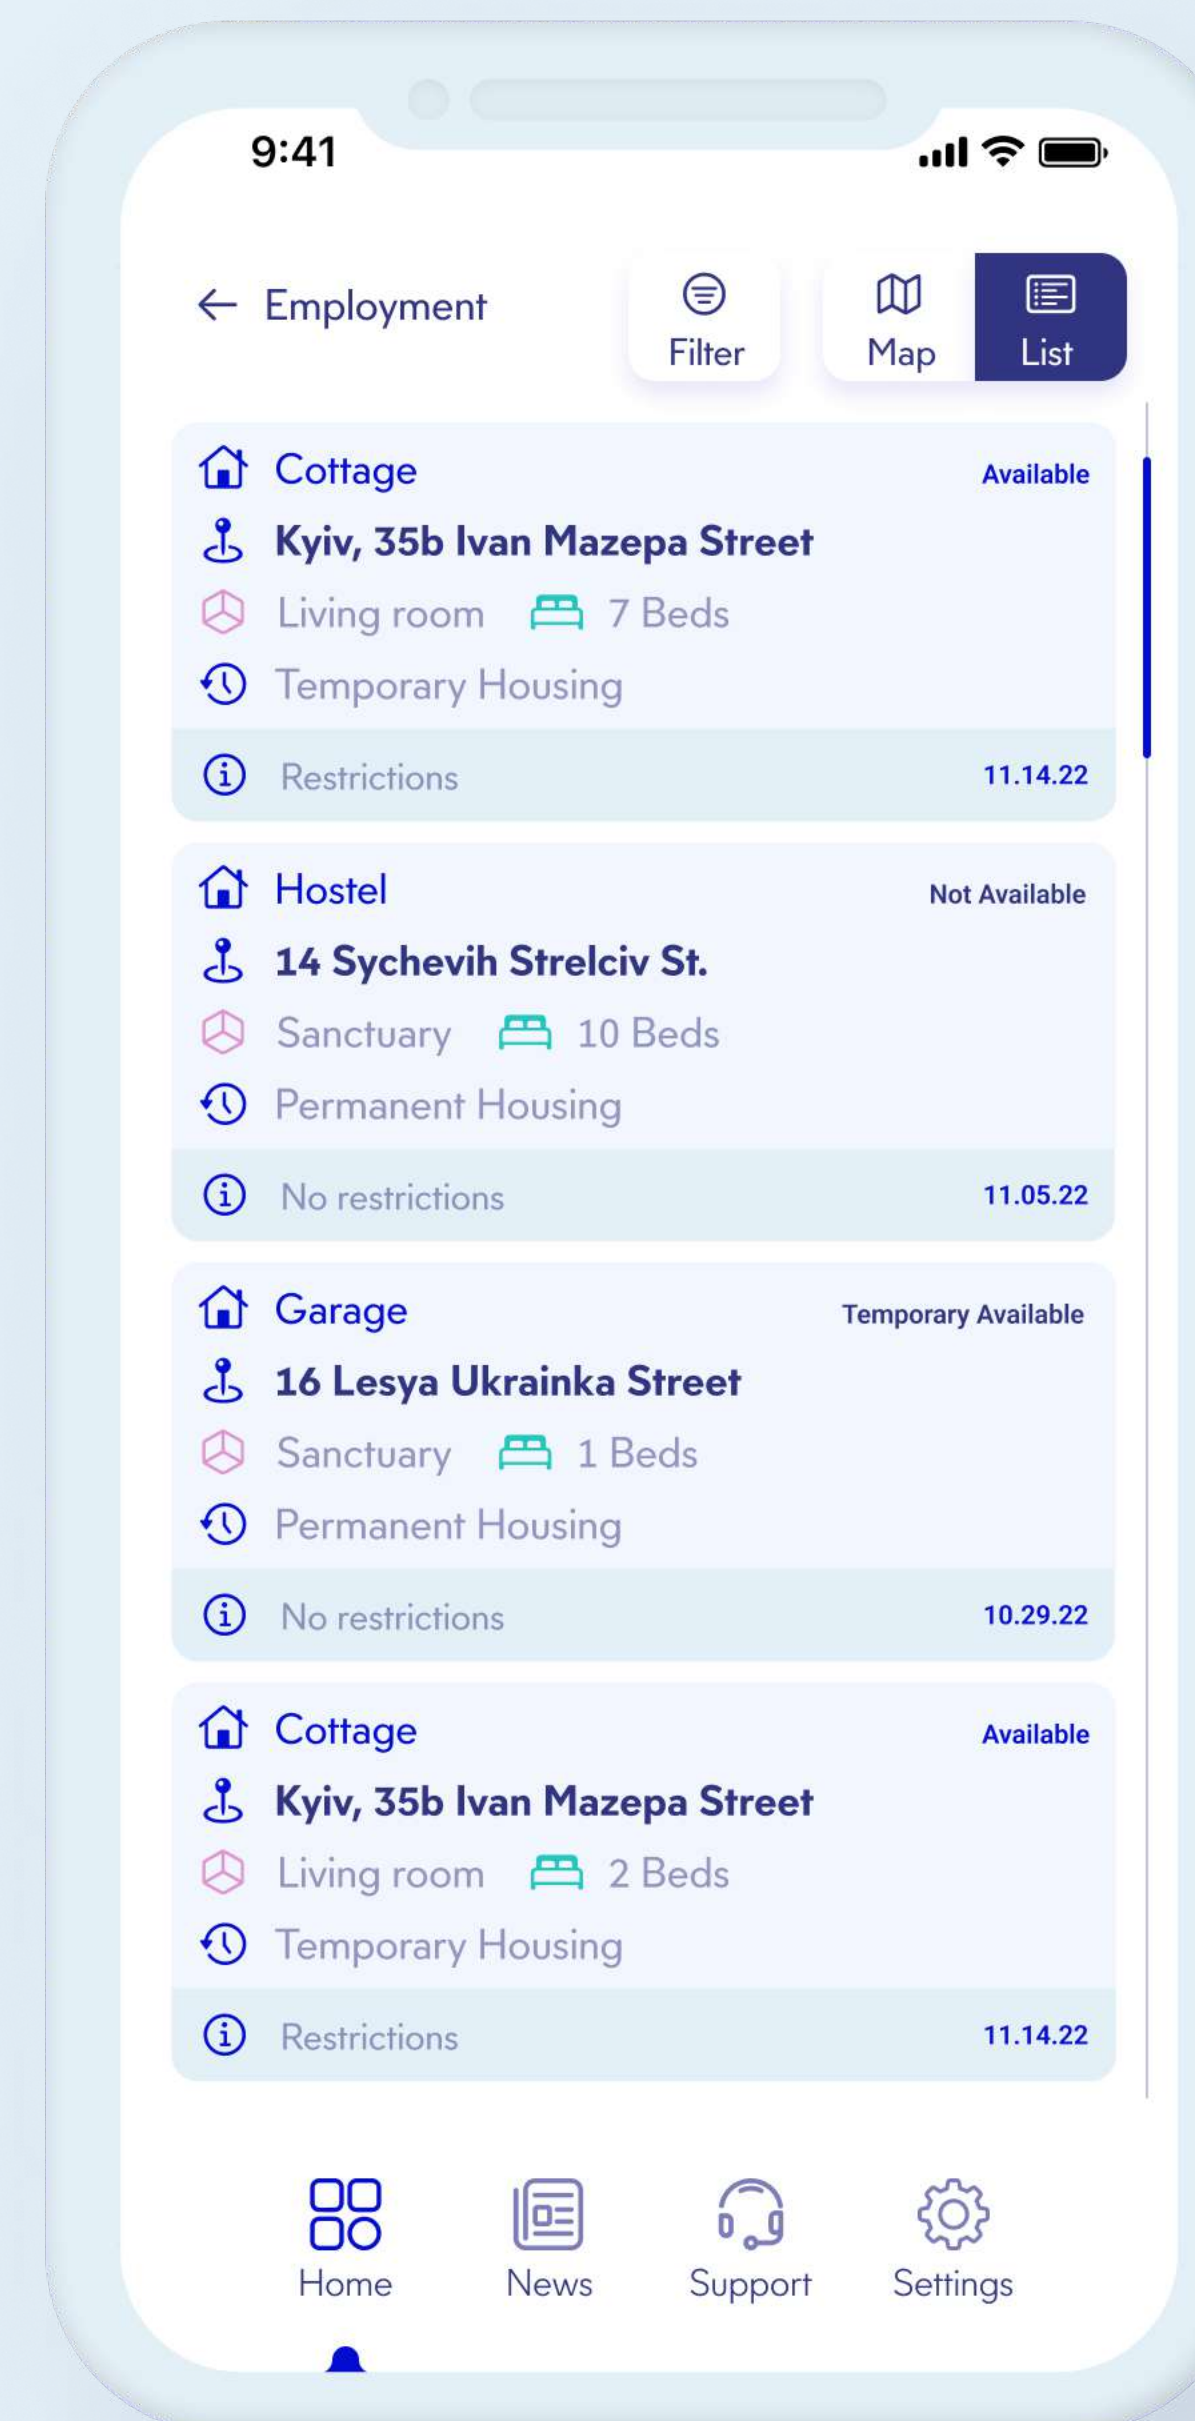

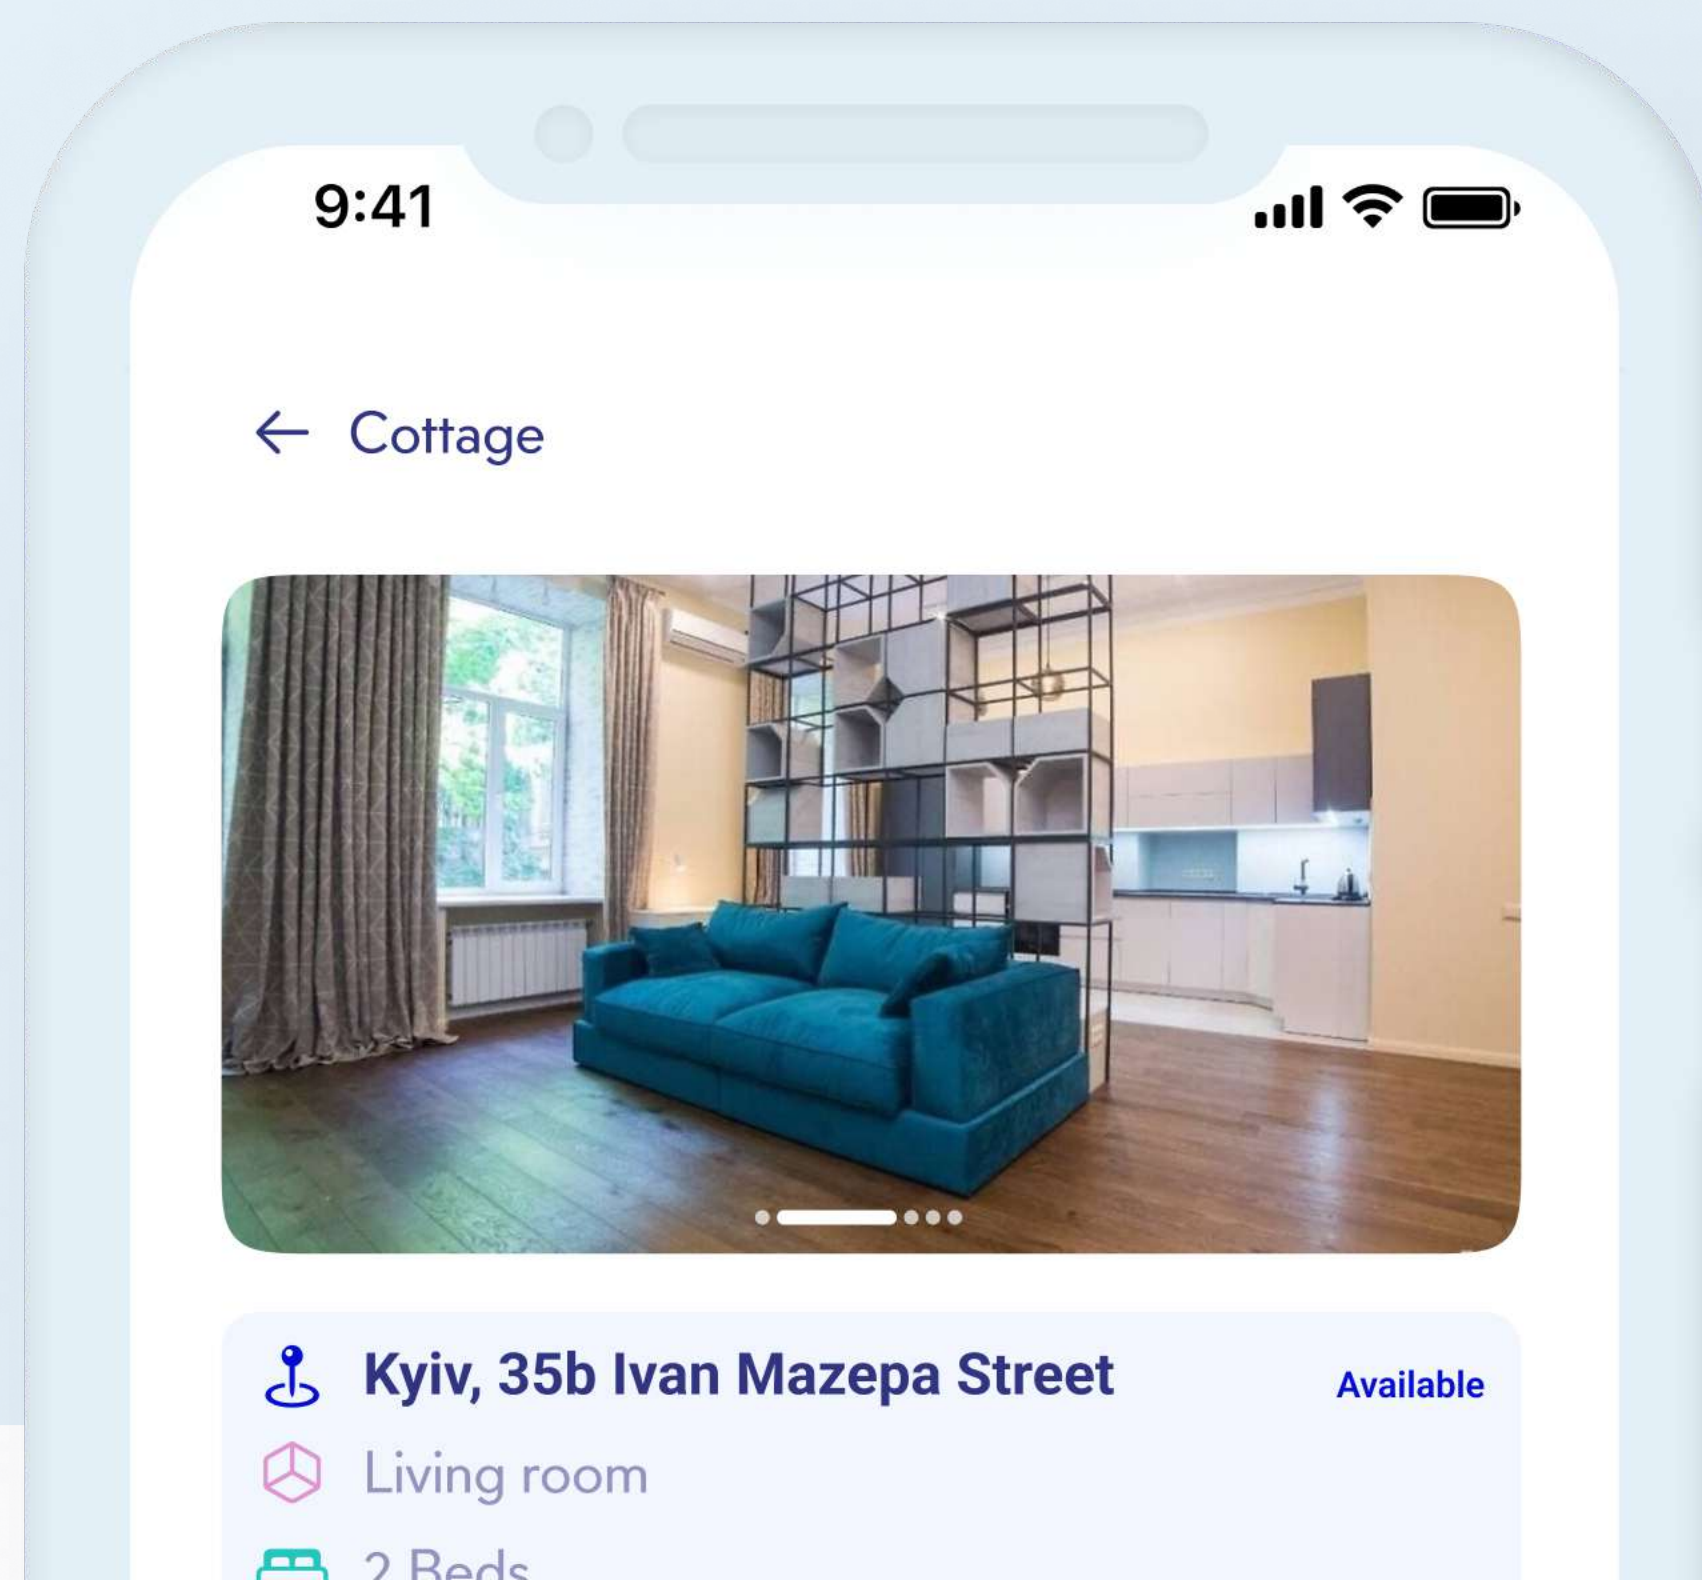

In the same case, filters work that can refine **the parameters for displaying objects.**

Result

We have developed a **mobile application** for the Baranova27 Charitable Foundation, in the wake of events in Ukraine in 2022, which reveals the idea of the project - **assistance in the adaptation of migrants** from all over the world to new living conditions in other countries, starting from basic needs, finding housing and medical care to assistance with paperwork and employment.

The customer received an **effective product** in the form of an info service that allows users, being in another country, **to receive up-to-date data** on solving legal, social and domestic issues.
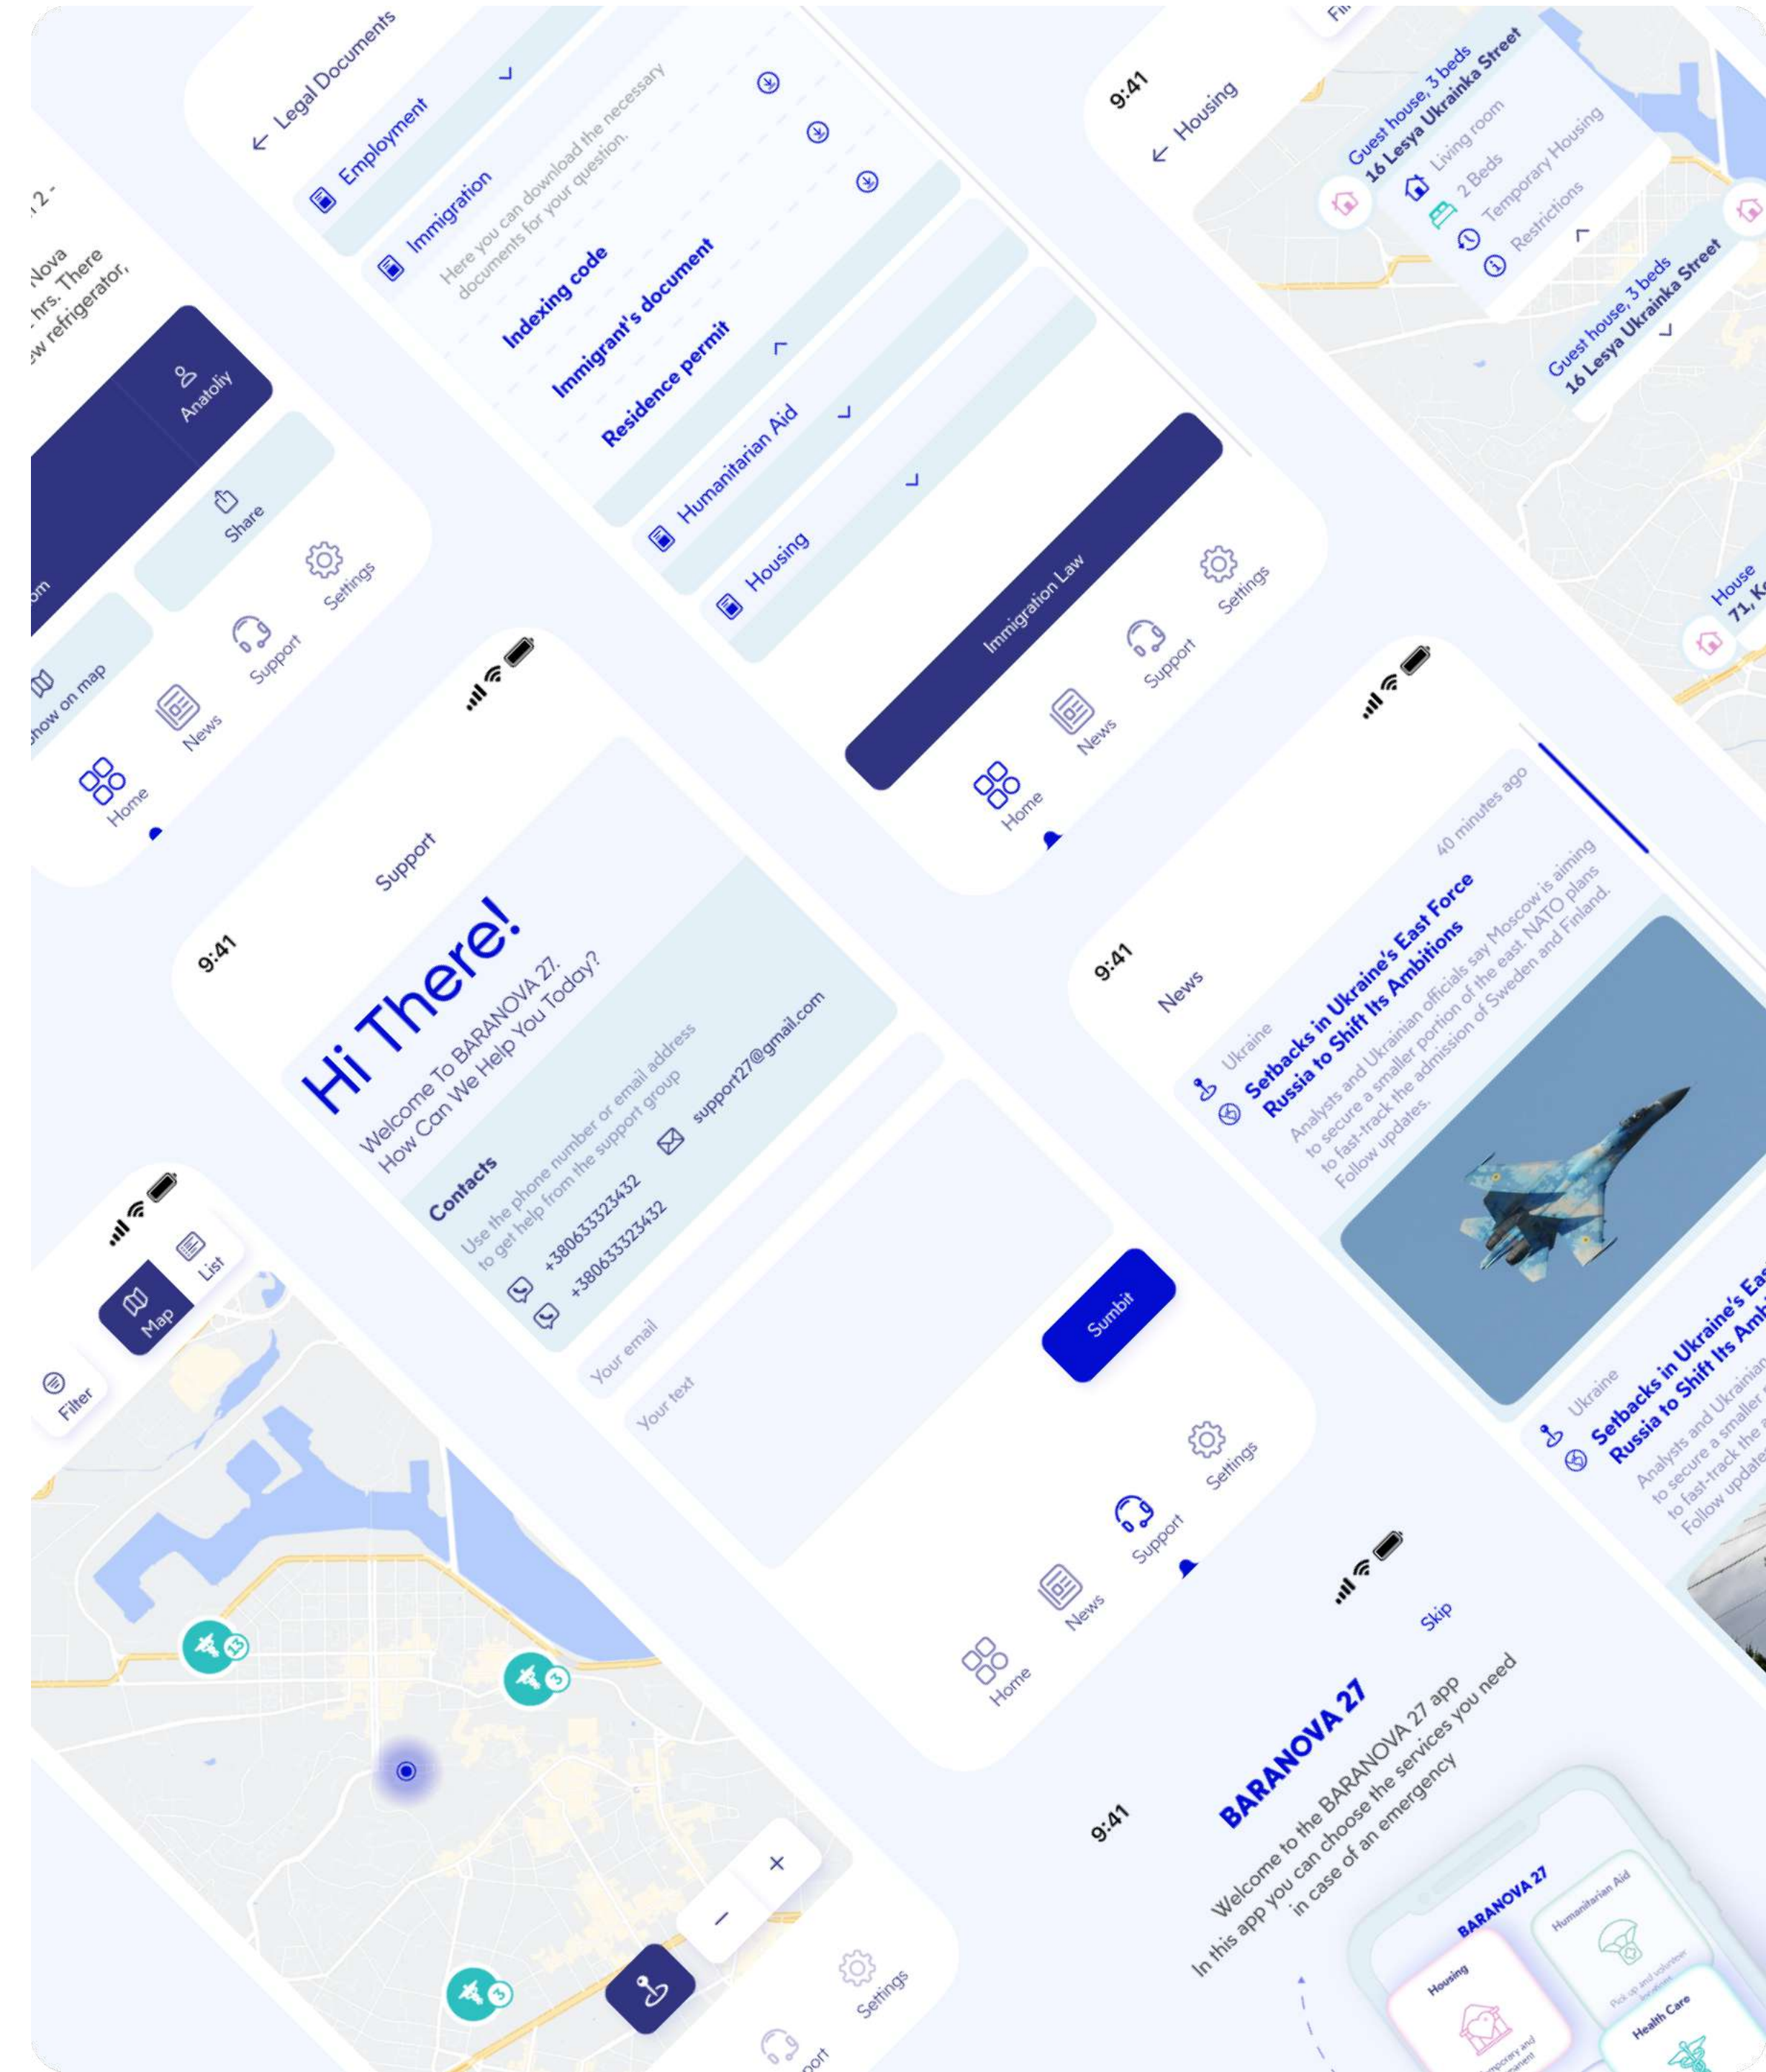

If you have any questions or wishes, please contact us in a convenient way for you.
